## EC28 i Transmitter Intrinsically Safe for Toxic Gases, O<sub>2</sub> and H<sub>2</sub>

Where toxic gases, oxygen or hydrogen are to be monitored in areas with a particular risk of explosion, the intrinsically safe EC28 i transmitter along with GfG's control units is a reliable and cost-effective solution. The power supply and transmission of the measured values are carried out via two-wire cabling.

#### Intrinsically safe operation

Due to its intrinsically safe build, the EC28 i can be used even in areas with a particularly high risk of explosion. A safety barrier (SB1 or Zener barrier; optionally available) has to be connected between the transmitter and the programmable logic controller (PLC) to convert the supply voltage to 24 V DC. This prevents the power lines from igniting within the Ex zone. The intrinsic safety of the EC28 i is ATEX-certified and makes it suitable for applications up to Ex zone 0.

#### **Communication and Service**

Communication is carried out via a 4 to 20 mA signal. The Smart Sensor technology enables quick and easy replacement of the sensor. Adjustments can be made using the RC2 remote control (one-man calibration).

#### **Remote Control RC2 (optional)**

Gases like ammonia and hydrogen are lighter than air. Transmitters with these

sensors are therefore installed near the ceiling. To simplify servicing, these transmitters can be equipped with a permanently installed cable meaning that the RC2 remote control can be connected for maintenance work and settings can be made from ground level. The display of the RC2 remote control shows the same information as would be shown by the EC28 versions with a display. This makes inspection, maintenance and calibration much easier.

#### **Reliable Measurement & Minimal Operating Costs**

The sensor and built-in temperature compensation ensure the highest measuring accuracy. The long sensor service life and low maintenance requirements ensure minimal operating costs.

#### Variants for Every Application

The basic version of the EC28 is sufficient for many applications. For specific requirements, the EC28 is also available in a wide variety of versions:

EC28	basic version for a wide range
EC28 D	with display for showing the current measured values
EC28 DA	with display, bright LED
	warning lights and integrated alarm horn
EC28 DAR	with display, alarm horn and
	relay for additional external
	alarm devices
EC28 B	with Modbus interface
EC28 DB	with Modbus interface
	and display
EC28 DAB	with Modbus interface,
	display, bright LED lights and
	integrated alarm horn
EC28 i	intrinsically safe
EC28 Di	intrinsically safe and
	with display

Together with GfG's sophisticated controllers, all versions of the EC28 are the perfect choice for detecting a wide range of gases.
